

Lifting Solutions launches Aspire range™- a more sustainable choice for the lifting industry.

As the market shows a growing demand for sustainable products, Lifting Solutions Group recognizes the need to prioritize sustainability in the lifting industry. The Aspire range™ is the group's latest initiative to ensure they are leading the transformation towards a more sustainable future, without compromising quality nor safety.

The Aspire range™ includes carefully selected products with documented sustainability features that are more sustainable than their conventional equivalents. It is our aspiration for a lifting industry operated in a more sustainable way.

When you choose a product from our Aspire range™, you can trust that you're getting the same high quality and safety standards that you've come to expect from us. With proven, fact-based sustainability improvements, you're not only making the right choice for your business, but also a better choice for the environment.

Lifting Solutions aims to lead the sustainability transformation and set the standards for a more sustainable future in our industry. The range will include Round slings, Webbing Slings, Lashings and Fall Arrest Harness. Our ambition is to provide more sustainable products and expand the range in the near future.
