

CERTEX Danmark A/S expands with global set-up

Our Renewables Division, which covers all of Europe, is now expanding to USA and China to keep up with the increasing inquiries from our customers who also operate globally. In the U.S. we have established the subsidiary company CTX Lifting Solutions Inc. with office in Houston, Texas and our most recent location is in Ningbo, China.

“Expanding our business to cover USA and China has been a natural step for CERTEX Danmark A/S, and it allows us to keep up with the fast-paced global growth of the renewables industry” says Managing Director Majbritt Petersen.

Our extended presence enables us to become “glocal” and offer more convenient, localized services. With this set-up, we can support our global partners in the best possible way, where and when the need for our competences within consultancy, lifting products or services arises.

In-house engineering department

CERTEX Danmark A/S’ Renewables Division has built a strong team with extensive experience and technical knowledge and over the last two decades we have supplied special tools, lifting products and solutions to the top OEMs and asset owners within the renewable energy industry. We have our in-house engineering department with 10+ employees designing everything from simple lifting beams to large lifting tools with complex controlling and monitoring functions.

“It has been an extensive process and it has required massive preparations to get ready for the U.S. market” says Lars Christiansen, Head of Renewables.

Over the years, we have built up a great deal of knowledge about the U.S. market, and we have also learned that a local presence is essential. Therefore, we have extended our Renewables Division to add the necessary expertise in this area.

At CERTEX Danmark A/S we are grateful for the increasing demand we have experienced within the renewable energy industry and excited to announce to be ready to serve our existing and new partners in the U.S. and Chinese markets.
